Education

National Institute of Technology, Agartala
BS-MS Dual Degree in Mathematics and Computing

December 2021 - May 2026

GPA: 9.41/10.00

Technical Skills

Languages: C++, TypeScript, JavaScript

Backend: Node.js, Express, REST APIs, JWT, Prisma

DevOps: Docker, GitHub Actions

Core CS: Data Structures, OOP, STL, SDLC, Debugging

Frontend: React, Redux, Tailwind, HTML, CSS

Databases: PostgreSQL, Sequelize

Tools: Git, GitHub, Postman, Swagger, Jira

Testing: Jest, API Testing, Integration Testing

Experience

Full Stack Developer - MeetXpert | Expert Booking Platform

July 2025 - Jan 2026

- Shipped a two-sided expert booking platform with **120+ commits** across onboarding, discovery, booking, and dashboard workflows.
 - Built **8+ product flows** covering expert profiles, session listings, booking forms, dashboards, and media uploads.
 - Designed Prisma + PostgreSQL models for experts, sessions, bookings, availability, profiles and media.
 - Integrated **Cloudinary, Sentry, and Vercel Analytics** for media uploads, error monitoring and usage tracking.
- Tech:** Next.js, React, TypeScript, Node.js, Prisma, PostgreSQL, Cloudinary, Sentry, Vercel Analytics

Software Developer Intern - ShopEnGenie

Apr 2025 - June 2025

- Participated in requirement discussions and backend planning in a startup environment.
 - Contributed to migration of legacy **Spree (Ruby on Rails)** backend to **Medusa.js** (TypeScript), improving API modularity and feature iteration.
 - Debugged frontend-backend integration issues and resolved **10+ Jira tickets** across **API flows**, UI fixes, and feature updates.
- Tech:** Medusa.js, TypeScript, Next.js, React.js, Node.js, REST APIs, Jira

Frontend Developer Intern - Entrepreneurship Cell, NIT Agartala

May 2023 - Jul 2023

- Built 10+ responsive UI components using **React.js** and **Tailwind CSS**, improving consistency across devices.
 - Refactored components to reduce duplication and ensure cross-browser compatibility in a 5-member team.
- Tech:** React.js, Tailwind CSS, JavaScript, HTML, CSS, Figma

Projects

DecisionFlow - Team Decision-Making Platform

Frontend | Backend

- Built a **decision workspace** that turns scattered team input into structured votes, ownership, and clear outcomes.
 - Designed an **insight-first results view** with vote split, consensus risk, ties, and recommended next actions.
 - Shipped **end-to-end workflows** for auth, decision creation, voting, result tracking, and dashboard history.
- Tech:** TypeScript, React.js, Node.js, Express, PostgreSQL, Sequelize, JWT, REST APIs

Auditly - Multi-Tenant Backend

GitHub | API Docs

- Built a production-style **TypeScript backend** with JWT auth, tenant isolation, RBAC, and **API documentation**.
- Enforced **tenant isolation** by scoping all Prisma queries using **companyId** derived from **JWT**.
- Designed **async job processing** with **BullMQ + Redis** for email workflows, improving reliability via background workers.
- Implemented **auth flows** (email verification, password reset) and validated them with **Jest E2E tests**; ran **k6 load testing** with 100 virtual users.

Tech: TypeScript, Express, Prisma, PostgreSQL, JWT, Redis, BullMQ, Docker, Jest

Achievements

- Top 8% on LeetCode** (peak **1790+**); solved **1100+ problems** across LeetCode, CodeChef, and Codeforces.
- CodeChef 3 star** (max rating: **1704**, best contest rank: **35/42,193**); **Codeforces Pupil** (peak rating: **1285**).
- Rank 1/178 in CP Titans 4.0** (NIT Agartala); global ranks **2596** and **7669** in **Google Kick Start 2022**.
- SGPA 8.16 → 9.80**, **Dept Rank 1** (twice); **JEE Mains 35,746/1.4M+** (**98.63+** %ile Maths).
